

Most molecular biology workflow begins with nucleic acid purification and/or PCR. Whether your goal is to clone and express your favorite gene, sequence cDNA, or study epigenetic changes in a disease of interest, Matrix Life Science has a range of comprehensive, off-the-shelf solutions to accelerate your research. Effectively isolate nucleic acids from a variety of sample types using our GenElute purification products, or skip DNA purification altogether and go directly to PCR with Extract-N-Amp PCR Kits. Matrix Life Science also has a complete portfolio of PCR and RT-PCR reagents and kits for both qualitative and quantitative applications as well as a complete line of whole genome amplification (WGA) and whole transcriptome amplification (WTA) products. Our latest efforts are centered on providing unique solutions for studying the epigenome. With our breadth and quality of products, your sure to find the right solution for your needs!

Products:

-

[Molecular Biology Products](#)

-

[Automated Sequencing](#)

-

[Automation](#)

-

[Cloning & Expression](#)

-

[Custom DNA Oligos](#)

-

[Custom DNA Probes](#)

-

[Custom RNA Oligos](#)

-

[DNA & RNA Purification](#)

-

[Epigenetics](#)

-

[Molecular Biology Reagents](#)

-

[Nucleic Acid Detection](#)

-

[Nucleic Acid Electrophoresis](#)

-

[PCR](#)

-

[Plant Biotechnology](#)

-

[Whole Genome Amplification](#)
