

Proteomics research defines the dynamic nature of gene expression and regulation. Innovative technologies such as Seppro depletion products allow for deeper proteome investigation by making less abundant proteins accessible. Rapid, large-scale screening of changes in protein expression are possible with Panorama protein arrays. With Mass spectrometry based applications becoming increasingly popular, our AQUA peptides and Universal Protein Standards provide the superior tools for researchers to generate quantitative studies of specific protein expression and amino acid modification.

As a world-leading bio business, Matrix Life Science has the highly skilled professionals and technologically advanced tools to address the challenges you face to keep pace with the latest industry developments.

**Products:**

-

[Proteomics Products](#)

-

[Mass Spectrometry](#)

-

[Native Protein Sample Preparation](#)

-

[PEPscreen: Custom Peptide Libraries](#)

-

[Plant Proteomics](#)

-

[Post Translational Modification](#)

-

[Protein Arrays](#)

-

[Protein Chromatography](#)

-

[Protein Electrophoresis](#)

-

[Protein Structural Analysis](#)

-

[Protein Quantitation](#)

-

[Recombinant Protein Expression & Purification](#)
